EDUCATION

BNMIT Bangalore , B.E Computer Science, CGPA: 8.29	Oct 2023 – May 2027
MDRPU Kodimuddanahalli,Tumakuru , II PUC Science PCMB, 93.33	June 2021 – May 2023
MDRS Melanahalli,Tumakuru , 10th, 95.68	July 2017 – May 2021

Experience

- | | |
|--|------------------|
| Worked as a Web Development Intern at BNM Institute of Technology | Jun-July 2024 |
| <ul style="list-style-type: none">• Developed a secure Hostel Management System that streamlines student registration, room allocation, and fee management with distinct logins for wardens and students.• We created a hostel management system using a modern technology stack that included MongoDB for the database, Node.js and Express.js for the back-end and React for Frontend | |
| Woked as a Cyber Security intern at Ganaka Praudyogikee Tech Solutions pvt.Ltd | June - July 2025 |
| <ul style="list-style-type: none">• Gained hands-on experience in penetration testing using real-world tools such as Nmap, Wireshark and Metasploit• Demonstrated proficiency in ethical hacking by setting up and analyzing reverse shells using Netcat and MSFvenom in a controlled lab environment. | |

Projects

E-Commerce(Mini kart)

- Developed a full-stack e-commerce application using Node.js that enables customers to browse products, manage shopping carts. Implemented user authentication.
- Tools Used: Express.js,Node.js,React.js,Bootstrap css

Real Time Quiz Application

- Developed a Spring Boot-based Quiz Application with real-time evaluation of Java MCQs and fill-in-the-blank questions, providing instant feedback and result tracking
- Tools Used: Java , Springboot Framework

Metro Ticketing System

- Developed an IoT-based Metro Ticketing System using Arduino, RFID, servo motor, LCD, and buzzer to automate fare collection, validate passenger access, and provide real-time feedback
- Technologies Used:Arduino Uno,Python,RFID cards..etc

Crop Recommendation System

- A Crop Recommendation System is a machine learning project that predicts the most suitable crop to grow by analyzing soil nutrients and environmental conditions using a trained dataset.
- Technologies Used: Python,Machine learning,Pandas,Numpy,Model training and Evaluation

Skills

- **Languages:** Java,Python, C, JavaScript
- **Web Development:** React.js, Node.js, Express.js, HTML,Tailwind CSS, Bootstrap CSS
- **Backend Frameworks:** Spring Boot, Node.js, Django
- **Machine Learning:** Numpy,Pandas,Scikit-learn ,NLP,Transformers(Hugging Face).
- **Databases:** MongoDB, MySQL
- **Cloud:** AWS
- **Version Control:**Git & Github ,Docker

Participation and Certificates

- Represented at State-level Athletics 4 times
- Represented at State-level Chess Competitions
- Completed NPTEL Certification in Internet of Things (IoT)
